

Alexandria Mobility Plan

ADVISORY COMMITTEE MEETING #2

April 17, 2019

City Hall, Council Work Room

6:00 PM to 7:00 PM

AGENDA

- Welcome and Introductions (15 min)
- Where are we now? (10 min)
- About the Plan (15 min)
- Related Plans and Resources (10 min)
- Next Steps (10 min)

ADVISORY COMMITTEE MEMBERS

Committee Member	Appointee
Transportation Commission	Alyia Gaskins, Chair Stephen Klejst (Alexandria Transit Co.) Melissa McMahon (Planning Commission) David Brown (Planning Commission) Oscar Gonzalez Jake Jakubek (West of Quaker) Casey Kane (Traffic & Parking Board) Bruce Marsh (East of Quaker) Carolyn Schroeder (Environmental Policy Commission) Canek Aguirre (Councilmember) John Chapman (Councilmember)
Alexandria Commission on Persons with Disabilities	Debby Critchley
Alexandria Chamber of Commerce	Maria Ciarrocchi

WELCOME AND INTRODUCTIONS

- Learn: Meet the new project manager
- Share: Your ideas/goals for this plan

THE ROLE OF THE COMMITTEE

Mission: Provide input to City staff on the development of the Alexandria Mobility Plan (AMP)

Tasks:

- A.** Provide input on updated vision and guiding principles
- B.** Provide input on chapter-specific content
- C.** Discuss and advise on AMP update-related topics and questions
- D.** Support community engagement efforts by reporting back to commissions, boards, and groups represented

TENTATIVE MEETING PLAN

Meeting #3	May 15, 2019	Trends / Best Practices
Meeting #4	June 19, 2019	Vision / Outreach Plan
Meeting #5	July 17, 2019	Innovation Forum
Meeting #6	September 18, 2019	SWOT / Guiding Principles
Meeting #7	October 16, 2019	Chapter Specific Goals and Objectives
Meeting #8	November 20, 2019	Smart Mobility Policy Questions
Meeting #9	December 18, 2019	TDM Strategies
Meeting #10	January 15, 2020	Streets Strategies
Meeting #11	February 19, 2020	Document Review / Draft Outreach
Meeting #12	March 18, 2020	Outreach Update
Meeting # 13	April 22, 2020	Updates to Draft / Endorsement

WHERE ARE WE NOW

Progress on strategies from 2008
Transportation Master Plan (TMP)
and the City's 2017 Strategic Plan

TMP ACCOMPLISHMENTS

We've advanced many major initiatives:

- Transit: Priority Corridors
 - Corridor A constructed
 - Corridor B identified funding and updating design
 - Corridor C beginning design and environmental in 2019
- Bicycle and Pedestrian
 - Updated in 2016
- Streets
 - Complete Streets Policy
 - TDM strategies
- Parking
 - Comprehensive study for supply/demand parking policies

TMP Outstanding Items

Some initiatives have not been started:

- Conduct HOV studies
- Develop means of data collection that provides an efficient means of tracking the success of streets serving all users.
- Systematically prioritize curb space
- Conduct feasibility study for parking structures outside of downtown due increase transit usage

Opportunities

New staff is being hired to advance certain initiatives:

- Parking Program Manager
- Smart Mobility Manager

CoA Strategic Plan 2022 Targets

<ul style="list-style-type: none">• Increase the percentage of commuters using alternative transportation options from 37 percent in 2013 to 40 percent	<ul style="list-style-type: none">• 2019 estimate: 40% 
<ul style="list-style-type: none">• Reduce the number of traffic crashes from 1,440 crashes in 2015 to 1,400	<ul style="list-style-type: none">• 2019 estimate: 1209 
<ul style="list-style-type: none">• Reduce the number of traffic crashes that result in fatalities and severe injuries from 2015's 15	<ul style="list-style-type: none">• 2016 reported: 22 
<ul style="list-style-type: none">• Reduce the number of pedestrians and bicyclists struck by vehicles from 2015's 106	<ul style="list-style-type: none">• 2016 reported: 96 
<ul style="list-style-type: none">• Maintain the percentage of residents with a positive view of the overall ease of getting to places they usually visit at or above 2016's 73 percent	<ul style="list-style-type: none">• 2019 estimate: 77% 
<ul style="list-style-type: none">• Increase Alexandria's Pavement Condition Index rating from 58 out of 100 (fair) in 2016 to 71 out of 100 (satisfactory)	<ul style="list-style-type: none">• 2019 estimate: 60 

ABOUT THE PLAN

Including peer examples

Permit Refresh

PLAN OVERVIEW AND PURPOSE

- ▶ A strategic update to the 2008 Plan (not a completely new plan)
- ▶ Consistency with new policies and plans since 2008
 - ▶ Vision Zero
 - ▶ Complete Streets Guidelines
 - ▶ Bicycle and Pedestrian Plan
 - ▶ Environmental Action Plan 2040
- ▶ New context into vision, goals, and strategies
 - ▶ New mobility options
 - ▶ Enhanced technology
 - ▶ Changing demographics
- ▶ Opportunity to engage on the future of mobility in Alexandria

PHASED APPROACH

Phase I – 2019 - 2020

- ▶ Introduction, Vision and Guiding principles
- ▶ Ch 2 Pedestrian & Bike – incorporation only
- ▶ Ch 3 Streets
- ▶ Ch 5 Framework for Smart Mobility Chapter
- ▶ Ch 6 Transportation Demand Management (TDM)

Phase II – 2021 - 2022

- ▶ Ch 1 Transit
- ▶ Ch 4 Parking & Curbside Management
- ▶ Ch 5 Smart Mobility

STREETS CHAPTER

- Street type designation and roles (updates to functional class)
- Operations and management (traffic calming, one-ways, etc.)
- Guidance for new developments (connectivity)

Sample questions for the Streets Chapter:

- How do we improve connectivity in the City while preserving neighborhood character?
- How can we better utilize our existing streets (for whom)?

Arlington's Streets Element

Table of Contents

I.	Introduction.....	2
II.	Summary.....	3
III.	Policies, Implementation Actions and Performance Measures.....	4
o	A Well-Connected Network of Streets Compatible with Adjacent Land Uses	
o	Complete Streets that Accommodate All Users and Encourage Alternatives to Driving

o	Table 2: Local Streets Design Criteria	31
Appendix A: Traffic Crashes Statistical Summary		
Appendix B: Green Streets information		

Street Typology

This map designates specific types of arterial streets. The proposed typology has been developed to shape decision-making about a given street section in terms of its planned land-use context and multi-modal function. This overlay is the principal guide for the rebalancing, redesigning and rebuilding of arterial streets to become Complete Streets that provide for all modes of travel as well as serve the adjacent land uses. More specific guidelines for improving the various designs of existing streets within each general type are set forth in the Streets Modal Element. Non-arterial (local) streets should also have designed features to complement their land-use context and function as illustrated in the table below. Arlington will also continue to use its Functional Classification of streets to guide operational and maintenance priorities. Typical elements and dimensions for each street type are illustrated in the table below. Factors such as existing and planned land-use types and intensities, right-of-way availability, travel demand, transit operations, neighborhood character, historic designations, presence of mature trees, topography, and community concerns should be considered in the development of the final dimensions and design of any street.

STREET TYPE	Typical Section	Median	Travel Lane	Travel Shoulder	Access-Adjacent	Median-Adjacent	Median-Adjacent	Median-Adjacent
Arterial - Primary	100' Right of Way	10'	36'	10'	10'	10'	10'	10'
Arterial - Secondary	80' Right of Way	10'	36'	10'	10'	10'	10'	10'
Arterial - Tertiary	60' Right of Way	10'	36'	10'	10'	10'	10'	10'

Note: The nomenclature of the typologies, found in the legend and table above, is designed to help users understand the typology assignments by indicating where each street type is most commonly found. Land uses in the GLUP, other land-use plans or existing zoning designations are not meant to be affected, changed or interpreted based upon the name of an abutting street type.

Minneapolis' Streets Element

2010-2020 Plan

4. Ten-Year Action Plan.....	38
Objective 1: Make transportation design decisions based on place type in addition to street function	38
Objective 2: Ensure that all streets in the city are safe, convenient and comfortable for walking.....	43
Objective 3: Provide a well-connected grid of bike lanes.....	44
Objective 4: Provide the best possible transit service on a Primary Transit Network	45
Objective 5: Encourage people to walk, bike, take transit rather than drive	52
Objective 6: Optimize the use, safety and life of the street system	55
Objective 7: Manage and Operate Streets to Support All Modes of Transportation	60
Objective 8: Make consistent decisions for curbside uses	68

(Under Development)

TDM CHAPTER

- Non-infrastructure solutions to reduce single occupancy vehicle travel
- Education, encouragement, and marketing based

Sample questions for the TDM Chapter:

- How can we most effectively incentivize non-SOV trips in order to reduce congestion, GhG emissions, and municipal costs, and improve health and quality of life?
- How should we use technology to support improving mobility options?
- How should we integrate new modes into our TDM programs and ensure they are achieving our goals?

SMART MOBILITY CHAPTER

Smart Mobility Framework

The Alexandria Mobility Framework defines Smart Mobility as:

- Applying Information Technology (IT) to the transportation system
- Supporting more affordable and sustainable mobility choices
- Using advancements in IT to collect, analyze, and apply data to optimize the transportation network

Sample questions for Phase I of Alexandria Mobility Plan:

- Are there additional smart mobility initiatives should the City explore to better achieve our goals?
- What policy questions must we consider as we develop a program to expand smart mobility?
- What are our priorities?

Portland: Smart Mobility

PHASE II CHAPTER CONTENT

Phase II – 2021 - 2022

- ▶ Ch 1 Transit
 - ▶ Incorporate Alexandria Transit Vision Plan
 - ▶ Address policies to achieve vision
- ▶ Ch 4 Parking & Curbside Management
 - ▶ On-street and off-street parking
 - ▶ Balancing needs of freight, private cars, rideshare, and bikes/scooters
- ▶ Ch 5 Smart Mobility
 - ▶ Developing policies and strategies for advancing smart mobility solutions to achieve our goals

Alexandria Mobility Plan

ADVISORY COMMITTEE MEETING #3

May 15, 2019

City Hall, Council Work Room

6:00 PM to 7:00 PM

AGENDA

- Welcome and Introductions (10 min)
- Project Update (5 min)
- Plan Context & Discussion (35 min)
- Next Steps (10 min)

PLAN OVERVIEW AND PURPOSE

What the AMP is

- ▶ A guiding policy and strategy document for future planning and decision-making
- ▶ A strategic update to the 2008 Plan based on current context and needs
- ▶ An incorporation of new policies and strategies established since 2008

What the AMP Is Not

- ▶ Taking the City in a completely new direction
- ▶ A reconsideration of recent policy decisions
- ▶ A list of projects

PHASED APPROACH

Phase I – 2019 - 2020

- ▶ Introduction, Vision and Guiding principles
- ▶ Ch 2 Pedestrian & Bike – incorporation only
- ▶ Ch 3 Streets
- ▶ Ch 5 Framework for Smart Mobility Chapter
- ▶ Ch 6 Transportation Demand Management (TDM)

Phase II – 2021 - 2022

- ▶ Ch 1 Transit
- ▶ Ch 4 Parking & Curbside Management
- ▶ Ch 5 Smart Mobility

Professional Credentials

Master of Science, Civil Engineering, Carnegie Mellon University

Bachelor of Science, Civil and Environmental Engineering, Carnegie Mellon University

American Institute of Certified Planners

Years of Service with Firm

12

Erin brings 12 years of integrated multimodal transportation planning and analysis on a multitude of scales to her role as project manager. She has significant experience in urban planning related to transit-oriented development, complete streets and streetspace allocation, and modal network development for pedestrians, bicycles, transit, and vehicles. She is well versed in the application of travel demand models, sub-area models, and travel demand forecasts with a multimodal perspective. Erin is skilled in the effective analysis and development of recommendations for complex multimodal transportation systems and was instrumental in the development of the District of Columbia's award-winning multimodal long-range transportation plan—moveDC. Erin has developed fiscal constraint analysis and quantitative prioritization processes for a number of long-range plans. She also has led many stakeholder and public engagement processes and is passionate about merging technical planning with engagement—leading to clear, consensus-driven decision making.

ALEXANDRIA CONTEXT

Forecast Household Growth (Thousands; 2015-2045)

ALEXANDRIA CONTEXT

Forecast Employment Growth (Thousands; 2015-2045)

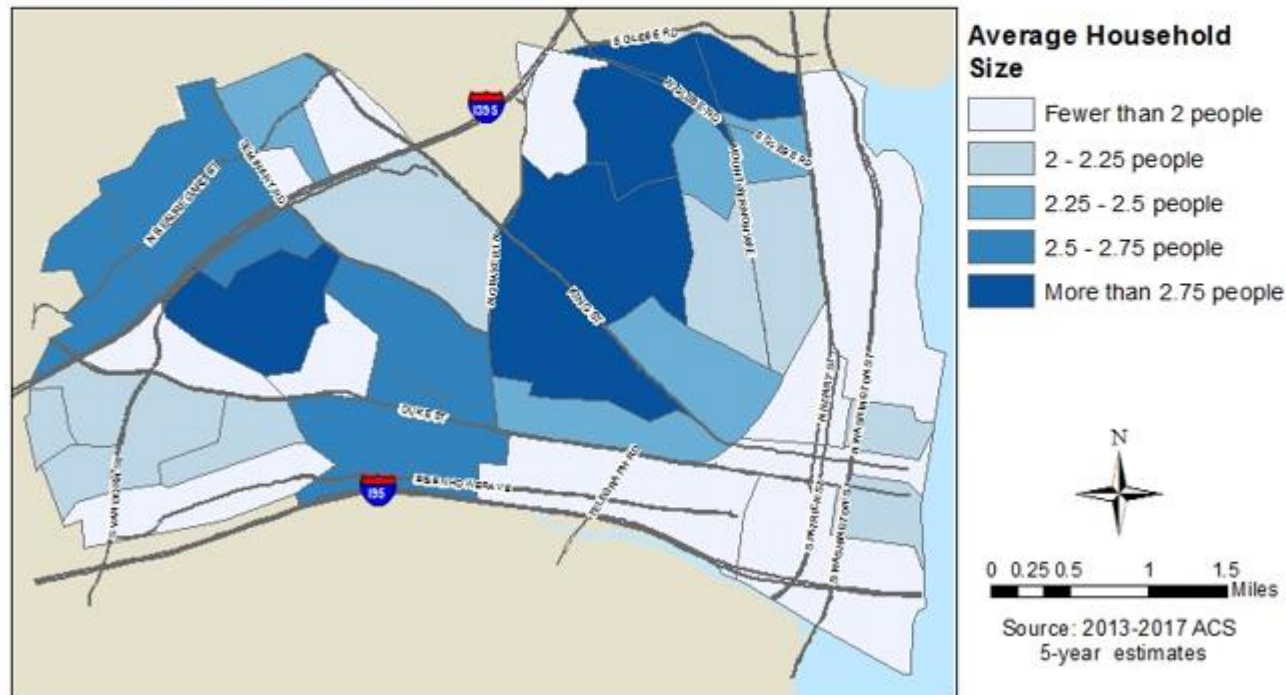

ALEXANDRIA CONTEXT

Household characteristics

Average Household Size

The average household size in the City of Alexandria (City) is 2.23, which is 4 percent larger than in 2012. Figure 1 shows how average household size varies by Census Tract.

Figure 1. Average household size, by Census Tract

ALEXANDRIA CONTEXT

Individual characteristics

Age

The City's median age is 36.4 years, up 2 percent from 2012. This corresponds with the 2017 and 2012 age distributions shown in Figure 4. The City had larger shares of residents between the ages of 65 and 74 in 2017 than in 2012, and smaller shares of residents between the ages of 20 and 29.

Figure 4. Age distribution, by ACS vintage

Source: 2008-2012 and 2013-2017 ACS 5-year estimates.

ALEXANDRIA CONTEXT

Median Household Income

The median household income in the City is \$93,400, which is 4 percent larger than in 2012². Figure 2 shows the City's current household income distribution, and Figure 3 shows median household income by Census Tract.

Figure 2. Household income distribution

Source: 2013-2017 ACS 5-year estimates.

ALEXANDRIA CONTEXT

Commute time

The average commute time among residents over age 16 is 31.8 minutes, up by 6 percent from 2012. Figure 6 shows that commute time distributions for 2012 and 2017 are relatively similar.

GENERAL MOBILITY TRENDS

Purpose of review:

- Understand what is happening in the world of transportation planning right now
- Discuss what ideas may be relevant to Alexandria
- Direct staff on further research

Mobility Trends

- Transportation Network Companies (TNCs)
- Autonomous vehicles
- Mobility as a Service for TDM
- Open Streets
- Waze effect
- Pilot bus lanes/ 'flexible implementation''
- Pricing
- Equity considerations
- Measuring what matters

Partnerships with TNCs

JUNE 7, 2018

How Lyft Works With Public Transit Agencies Across the Country to Eliminate Transportation Barriers

At Lyft, we envision a world in which cities are not built around parking lots and roads, but are reimagined to center around our communities. And we believe that partnering with public transit agencies is critical to this vision.

Partnerships with TNCs

Examples:

- **Dial-A-Ride service** - City of Monrovia, California
 - **Goal:** Expand mobility options; increase ridership of City's Dial-A-Ride service
 - **Program:** Access a Lyft ride anywhere in the GoMonrovia service area for \$0.50, and to easily connect to the LA Metro Gold Line
- **Paratransit Service** - Boston's MBTA; Regional Transportation Commission of Southern Nevada
 - **Goals:** Reduce cost and improve convenience of paratransit program
 - **Program:** Volunteers can request paratransit through TNC partners
- **First Mile / Last Mile**
 - **Jurisdiction:** Pierce County Transit, WA (free); Marin, CA, Charlotte, NC (discounted)
 - **Goals:** Improve access to transit, increase transit ridership
 - **Program:** Free or discounted fares with transit start/end point.

Autonomous Vehicles

WAMU | FEB 13

Toaster-Shaped Autonomous Shuttle Is First To Test On Public Roads In Maryland

Jordan Pascale

LISTEN

Olli operates in autonomous mode all by itself, using an array of sensors, lidar, radar, GPS and cameras. But it also has a "steward" that can take over in an emergency.

Jordan Pascale / WAMU

Autonomous Vehicles

How to achieve sustainability?

- Car-free or car-lite households
 - Land use
 - Fewer vehicle trips
- People-oriented streets/cities
- Prioritizing high-volume transit

How to fail at sustainability?

- VMT
 - Zombie Trips
- Auto trips
 - From sustainable modes
- Sprawl
- Auto-oriented streets/cities

What tools do cities have?

- Zoning
- Curbside management
- Street layout
- City plans
- AV testing
- Transit corridors
- Partnerships
- Lobbying

Mobility as a Service

The Rise of Open Streets

OPEN STREETS SUMMARY MAP - 2005

OPEN STREETS SUMMARY MAP - 2011

TACTICAL 10
URBANISM

OPEN STREETS

- PURPOSE:** To temporarily provide safe spaces for walking, bicycling, skating and social activities; promote local economic development; and raise awareness about the detrimental effects of the automobile on urban living.
- LEADERS:** City departments
Politicians
Advocates
Non-Profits
- SCALE:** City || District || Corridor
- FACT:** 50 of the 70 known North American open streets initiatives began within the last three years.

Open Streets initiatives are increasingly common in cities seeking innovative ways to meet environmental, social, economic, and public health goals. Open streets are often referred to as "ciclovía," which in Spanish translates literally as "bike path." The origin is largely thought to be Bogotá, Colombia, a city known worldwide for being a leader of the ciclovía/open streets movement. However, before there was Ciclovía in Bogotá, there was "Seattle Bicycle Sundays," which first launched in 1965, predating Bogotá's ciclovía by nearly a decade.

While the benefits of Open Streets initiatives are widely recognized, perhaps the most tangible benefit is the social interaction and activity that develops—thousands of people of all ages, incomes, occupations, religions, and races have the opportunity to meet in the public realm while sharing in physical or social activities. In doing so, participants develop a wider understanding of their city, each other, and the potential for making streets friendlier for people.

The resulting vibrancy therefore enables people to experience their city's public realm in a different way, which helps build broader political support for undertaking more permanent pedestrian, bicycle, and other livability improvements. In this way, open streets are a tool for building social and political capital, while having very real economic impacts for businesses, vendors, and organizations along the chosen route.

Perhaps Waterloo, ON City Councillor, Melissa Durrell, said it best when describing her city's Car Free Sunday initiative: "This is about bringing people into the core."

Driving into part or all of D.C. could require paying a toll in the future, under a \$480,000 study proposed by the D.C. Council.

The WAZE Effect

**THERE ARE BETTER WAYS TO
KILL TRAFFIC THAN LYING TO
WAZE**

People Centered Metrics

- Measuring person-throughput instead of vehicle throughput
- Pedestrian Level of Service / Quality of Service
- Bicycle Level of Service / Quality of Service
- Transit capacity and quality of service
- VMT Reduction (San Francisco)

Equity

- Focus on the intersection of health and transportation
- Access and opportunity
- Transportation cost burdens

Discussion

- Which of these topics do you think are most relevant for the AMP?
- Are there other trends and topics that you think are important as well?

Discussion

- What do you think are the biggest challenges facing Alexandria (current and future)?
- What do you think are the biggest opportunities (current and future)?

Next Steps

- Upcoming meetings - Discussion

NEXT STEPS (TENTATIVE)

Meeting #3	May 15, 2019	Trends / Best Practices
Meeting #4	June 19, 2019	Vision / Outreach Plan
Meeting #5	July 17, 2019	Innovation Forum
Meeting #6	September 18, 2019	SWOT / Guiding Principles
Meeting #7	October 16, 2019	Chapter Specific Goals and Objectives
Meeting #8	November 20, 2019	Smart Mobility Policy Questions
Meeting #9	December 18, 2019	TDM Strategies
Meeting #10	January 15, 2020	Streets Strategies
Meeting #11	February 19, 2020	Document Review / Draft Outreach
Meeting #12	March 18, 2020	Outreach Update
Meeting # 13	April 22, 2020	Updates to Draft / Endorsement
